The power factor is the ratio of real power (kW) to apparent power (kVA) and is an important parameter in AC power systems. PFC components refer to the various electronic components used in power factor correction circuits. These components are designed to correct or improve the power factor and ensure efficient power transmission and utilization.

HT Motor Power Factor Improvement A cutting-edge solution designed to optimize power factor and enhance energy efficiency for high-voltage motors. With state-of-the-art technology, this product helps reduce electricity consumption and lowers operational costs, ensuring sustainable and eco-friendly performance.

LT Reactor Model : T-FK-DR Frequency : 50/60Hz. Our filter reactors are made of high-class transformer sheets ( CRGO), low loss and copper wire or aluminium band. They are dried and impregnated in vacuum with environment friendly low-styrole resin which ensures they can withstand high voltages. have low noise levels, and offer a long operating life pending on ...
