Is biomass a source of electricity in Trinidad & Tobago?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Trinidad and Tobago: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What makes Natron batteries so powerful?

The Power of Blue. The secret behind Natron's sodium-ion batteries is our patented use of Prussian blue electrodes. Prussian blue, when combined with sodium ions, creates a chemistry that delivers super-fast charging and power delivery, with no friction. It's that lack of friction that enables our batteries to last much longer (over 50,000 cycles).

(Trinidad Express, 23.Apr.2023) -- The country's lone cooking gas producer and several petrochemical plants at Point Lisas have been shut down amid a full-blown natural gas crisis triggered by an electrical fire at bpTT's Mahogany hub and continued mechanical issues at its Cassia C platform.
