

Trinidad and Tobago vehicle to grid system

Will the future carbon factors for electricity generation decrease in Trinidad & Tobago?

A Unique Approach for Sustainable Energy in Trinidad and Tobago 24 Carbon Intensity of Power Generation

It is expected that the future carbon factors for electricity generation in T&T will decrease (in comparison to the current ones) -- for three main reasons:

How is electricity produced in Trinidad and Tobago?

Source: IEA, 2012b. 19 Since April 2013, all public electricity is produced exclusively from gas, when the Cover power station on Tobago started to operate on gas instead of oil. A Unique Approach for Sustainable Energy in Trinidad and Tobago 24 Carbon Intensity of Power Generation

Are wave energy converters sustainable in Trinidad & Tobago?

A Unique Approach for Sustainable Energy in Trinidad and Tobago 206 Two of those wave energy converters were deployed in 2012 at the European Marine Energy Centre.

How can we save energy in Trinidad & Tobago?

A Unique Approach for Sustainable Energy in Trinidad and Tobago 278 Cooling & Ventilation The only savings here in households without air-conditioning will come from changes in behaviour (turning off fans in unoccupied bedrooms, for example). We assume a 29% reduction here.

What should the Meteorological Service of Trinidad and Tobago do?

Due to a lack of PV systems in T&T that would reveal the specific energy yield of systems, the Meteorological Service of Trinidad and Tobago should acquire and provide local solar radiation data and allow easy access to this information, especially to reflect local conditions on the different coastal sides of the islands.

Will Trinidad & Tobago generate 6% of the current peak electricity demand?

So far, the Government of Trinidad and Tobago in its draft Green Paper has only expressed a goal of generating 6% of the present peak electricity demand (i.e. 60 MW) from RE sources (mainly wind) by 2020.

The government of Trinidad and Tobago approved the project last week, to be developed and executed by a consortium between Lightsource bp, bp Alternative Energy Trinidad and Tobago and Shell ...

This paper explores the conditions which collectively create a favorable environment for the adoption of EVs and presents evidence to justify the need for enhanced EV adoption measures in Trinidad & Tobago. Policy ...
