

Tunisia drax power limited

Where is Drax based?

The principal downstream enterprises are based in the UK and include Drax Power Limited, which runs the biomass fuelled Drax power station, near Selby in North Yorkshire. The Group also runs an international biomass supply chain business. The company is listed on the London Stock Exchange and is a constituent of the FTSE 250 Index.

What happened to Drax Power Station?

One significant change was the emergence of vertically integrated companies, combining generation, distribution and supply interests. In certain cases, it became necessary for generation assets to be divested, and so in 1999 Drax Power Station was acquired by the US-based AES Corporation for £1.87 billion (US\$3 billion).

How many generating companies did Drax Power Station have?

Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies. Over the years that followed privatisation, the map of the industry changed dramatically.

Why did Drax push back the start of new gas-fired power stations?

In November 2024, Drax Group Plc pushed back the start of three new gas-fired power stations in South Wales, Suffolk, and Bedfordshire to next year because of delays in getting the units connected to the grid. Drax had previously stated that the facilities would start in Autumn 2024. Drax Group's key asset is Drax Power Station.

Did Drax buy Opus Energy?

In 2016, Drax Group acquired Opus Energy for £340 million funded by a new acquisition debt facility of up to £375 million. In October 2017, Drax sold Billington Bioenergy for £2 million to an AIM-listed energy company called Aggregated Micro Power Holdings.

What is Drax Group's key asset?

Drax Group's key asset is Drax Power Station. Originally built, owned and operated by the Central Electricity Generating Board (CEGB), Drax Power Station was constructed and commissioned in two stages. Stage one (units 1, 2 and 3) was completed in 1974.

The structures at Drax are dwarfed by the cooling towers at the Kalisindh power plant in Rajasthan, India, the tallest in the world. Each stands an impressive 202 metres tall - twice the height of the tower housing Big Ben and just a touch taller than the UK's joint fifth tallest skyscraper, the HSBC Tower at 8 Canada Square in London's Canary Wharf.

Drax Power Station is the UK's single largest source of renewable power, providing 2.6GW of dispatchable secure generation. In 2023, it provided 4% of the UK's electricity and 8% of its renewable power. The Selby site provides enough secure power for 4 million homes, and is not dependent on the wind blowing or the sun shining to generate. ...

Drax's iconic Cruachan "Hollow Mountain" power station set for £80 million upgrade > About Us
Drax Group's ambition is to become a carbon negative business by 2030, through innovative greenhouse gas removal technology.

"Much of Britain's conventional power generators like coal and nuclear stations have retired in recent years," explained Dr Iain Staffell of Imperial College London, and lead author of the quarterly Drax Electric Insights report series. "Fewer dispatchable generators means less competition and higher prices, making cheaper electricity from the continent much more ...
