

# Tunisia lead power solutions

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

Does Tunisia have a power grid?

Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023. Moreover, in August 2023, Tunisia's sub-sea connection project with Italy, called ELMED, was approved for \$337 million funding from the European Commission.

Where does Tunisia's power come from?

The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company (CPC), a 471-MW combined-cycle power plant. The CPC plant was officially handed over to STEG in May 2022 ending a 20-year power purchasing agreement between both companies.

Can Steg meet peak summer electricity demand in Tunisia?

STEG is hard-pressed to meet peak summer electricity demand, let alone keep up with Tunisia's annual 5% growth in power consumption. Approximately 97% of Tunisia's electricity is generated from fossil fuels, mainly natural gas. Through June 2023, nearly 47% of Tunisia's natural gas needs were met through imports (mainly from Algeria).

Qair Feriana Solar PV Park is a 10MW solar PV power project. It is planned in Kasserine, Tunisia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the ...

Vantom Power is a leading PERC Solar Panel Manufacturer based in India, with over ten years of experience in power solutions. They offer a lifetime warranty on Polycrystalline and Mono PERC Solar Panels and export them to Tunisia and other countries worldwide.

The scope of the project includes the installation of 5MW of solar power together with a battery energy storage system, integrated with existing gas turbines in an off-grid set-up. The energy produced will be consumed on-site, enabling the upstream operations to significantly reduce gas consumption and therefore avoid 6,500t/year of CO<sub>2</sub> ...

In response to these challenges, the USAID Power Tunisia program is a five-year program funded by the United States Agency for International Development (USAID) with the mission of promoting the adoption of renewable energy and enhancing energy efficiency solutions by Tunisian firms, while strengthening the capabilities of key stakeholders in ...
