Who provides electricity in Turks and Caicos?

Together, both companies provide electric power in Turks and Caicos to over 15,000 customers and are regarded as one of the most reliable electricity providers in the Caribbean. FortisTCI offers customized energy audits to help customers achieve greater energy efficiency and savings.

Who owns Turks & Caicos utility limited (TCU)?

Turks & Caicos Utility Limited (TCU) is wholly owned by FortisTCI and provides electricity to Grand Turk and Salt Cay. In 2010, the government of Turks and Caicos contracted with a consultant to draft recommendations for exploring the use of renewable energy and energy efficiency technologies to create a more sustainable energy framework.

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conversion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

Who owns Turks & Caicos electric grid?

The government-owned Turks and Caicos electric grid was privatized in 2006 through a series of acquisitions to create a vertically integrated structure. FortisTCI, a wholly owned subsidiary for Fortis Inc., is an international utility holding company that owns and operates generating stations and distribution lines across the islands.

Largely due to the expansive Ramsar conservation site off the south of North Caicos, Middle Caicos and East Caicos, the Turks and Caicos Islands collectively have almost 200,000 acres (800 km<sup>2</sup>) of protected nature reserves, national parks, and historical sites. This equates to about 44% of land in the country.
