

Turks and Caicos Islands solar power home system cost

Where can solar power be installed in Turks & Caicos?

Solar-derived power is increasing in popularity, with many private installations visible throughout the country, especially on new Turks and Caicos villa projects. Several local companies specialize in both supply and installation of alternative energy systems. The FortisTCI electricity plant on Providenciales.

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

Who produces electricity in Turks & Caicos?

In the Turks and Caicos ,all public electricity generation is run by Fortis TCI,a vertically integrated company that provides both power generation and distribution.

Does Turks and Caicos have a policy on energy eficiency?

Turks and Caicos has few policies related to energy eficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-eficient technologies.

Who owns Turks & Caicos utility limited (TCU)?

Turks & Caicos Utility Limited (TCU) is wholly owned by FortisTCI and provides electricity to Grand Turk and Salt Cay. In 2010, the government of Turks and Caicos contracted with a consultant to draft recommendations for exploring the use of renewable energy and energy efficiency technologies to create a more sustainable energy framework.

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conver- sion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

The electricity network on North Caicos and Middle Caicos are interconnected, and the 1.2 MW system will produce 30% of the twin islands" electricity from solar energy once commissioned next year. The project will reduce the amount of fuel needed to generate electricity, thereby lowering carbon emissions and the cost of energy production over ...
