The Powerstation has a PV connection with an input power of up to 7000 watts. UPS mode. Uninterruptible power supply in case of emergency. In case of a power failure, the UPS mode reacts in less than 20 milliseconds and supplies power to devices such as alarm centres or servers so that no important data is lost. IP65 waterproof design

All operational coal-fired power stations over 50MW are listed below. Five plants were shut down at the end of 2019 to reduce air pollution, [1] leaving total installed capacity at about 17 GW, with 1.3 GW under construction. [2] However [3] government may continue subsidizing some of the most polluting plants in 2020. [4] [5] In 2019 almost 500 million lira was paid to them.
