

# Türkiye renewable power partners

What type of energy does Türkiye generate?

Approximately 56% of Türkiye's electric power generation capacity consists of renewable energy, including hydroelectric, wind, solar, geothermal, and biomass power plants, making Türkiye the fifth-largest generator of renewable energy in Europe and the 11th largest in the world.

How much power will Türkiye have in 2035?

According to Türkiye's 2020-2035 National Energy Plan, Türkiye's power generation capacity will reach 189.7 GW in 2035 (a 79% increase from 2023). Türkiye's share of renewable energy will increase to 64.7% with solar power capacity increasing 432% and wind capacity increasing 158%.

Is Türkiye planning a nuclear power plant?

Türkiye has been considering nuclear energy power plants as a future base load and designated three locations for the implementation of three separate nuclear power plant (NPP) projects. These planned NPPs are large power plants with total capacities between 4000-5000 MW.

Is Turkey a renewable country?

Its climate and topography contain natural resources suitable for renewables energies such as wind and solar. However, like many countries of the Global South, Turkey has not been able to afford to develop renewable energies, and has mainly used non-renewable energy sources, such as coal and natural gas.

Does Türkiye have a regulated electricity market?

Türkiye has a semi-liberalized and moderately regulated market. Energy Exchange Istanbul (EXIST) is Türkiye's electricity spot market, which manages day-ahead and intraday markets where 40% of electricity is traded among 854 market participants.

How will Türkiye achieve net-zero emissions by 2053?

Türkiye has committed to achieving net-zero emissions by 2053. As a result, Türkiye plans to continue supporting renewable energy investments including nuclear energy projects on a BOT or build-own-operate (BOO) basis. Türkiye is also open to public-private partnerships.

4 Investment Office presented Türkiye's renewable energy growth targets for 2035 and its plans for the clean energy transition to Dutch sector representatives at an exclusive event ...

French TotalEnergies Partners with Rasnans Holding to Develop Renewable Energy in Türkiye  
Invest News Detail French TotalEnergies signed an agreement with Türkiye's Rasnans Holding to develop a joint-venture by acquiring a 50 ...

Türkiye's wind energy sector, currently valued at \$2.2 billion, could expand to \$7.5-8 billion by 2035 with continued support, according to Ibrahim Erden, president of the Turkish Wind Energy ...

Bayraktar announced plans for \$100 billion in renewable energy investments by 2035, calling on experienced and new German investors to partner in Türkiye's energy transition. He highlighted the country's roadmap to expand wind and solar energy capacity from 31,000 megawatts to 120,000 megawatts by 2035.

Despite the rising share of renewable energy in total electricity generation, carbon emissions from electricity generation are at 2017 levels. ... Additionally, despite T&#252;rkiye's energy transition commitments, the NEP states ...

"We deeply value investments in renewable energy both in T&#252;rkiye and worldwide. With a goal of playing an active part in T&#252;rkiye's green energy transition, it was crucial that we work with a reputable and impactful global player. We're excited to collaborate with TotalEnergies to jointly invest in green projects.

T&#252;rkiye's situation of renewable energy. T&#252;rkiye is a developing country whose electrical energy consumption is going up each day. Electricity consumption is expected to be 370 TWh in 2025 and 591 TWh in 2040 in the base scenario according to the T&#252;rkiye Electricity Demand Projection Report covering 2020-2040.

Between 2005 and 2024, through an increase in renewable capacity from 13GW in 2005 to 67.5GW in 2024, T&#252;rkiye has avoided 892 million tons of CO2 emissions. An important boost ...
