

What is a Siro battery plant?

A new battery plant in Gemlik (Turkey) is in operation with the establishment of the Siro joint venture between Turkish electric car manufacturer Togg and Farasis Energy. With more than twenty years of experience in research and development and with over 150 patents, Farasis Energy is shaping the future of electric mobility as a pioneer.

Will Siro make its own battery cells?

"Siro will then develop and manufacture its own innovative battery cells, based on Farasis Energy's latest technology," the statement said. Togg priced its debut vehicle T10X in Turkey in March and plans to start deliveries there in July 2023.

Will Siro supply farasis Energy Europe?

According to earlier information, Siro will also supply customers of Farasis Energy Europe as well as its own customers in the fields of automotive, industrial applications and stationary storage solutions. In addition to cell production, a laboratory for the development of Farasis cells will also be built at the site by the end of 2023.

The cycle life of the Sirius storage system is 1 million cycles at 100% DOD with negligible capacity fade and impact of charge/discharge rates. Combined with very low maintenance requirements, Sirius delivers power and energy at an unmatched cost per cycle. The Sirius Super Capacitor Module comes with a manufacturer 10-year swap-out warranty.

Türkiye's National Energy Plan predicts that solar will account for 28% of total installed generation capacity in 2035 and energy storage systems will reach 7.5 GW of installed capacity by ...
