

U S Virgin Islands solar pv panel capacity

How many electricity grids does the USVI have?

The USVI has two separate electricity grids. Each grid is located on a different main island and is managed by WAPA, an independent governmental agency.

What is the cost of electricity in the USVI?

The electricity rates in the USVI are \$0.47 per kilowatt-hour (kWh). This is higher than the Caribbean regional average of \$0.33/kWh.

How does oil affect the cost of electricity in the USVI?

The USVI, like many island nations, is heavily reliant on fossil fuels for electricity generation. This reliance leaves the USVI vulnerable to global oil price fluctuations, which directly impact the cost of electricity. Assumes an average electricity price of \$0.50/kWh and consumption of 767.4 gigawatt-hours (GWh).

Does Virgin Islands have a net metering program?

According to the 77 NC Clean Energy Technology Center and DSIRE, the U.S. Virgin Islands has a net metering program. Relevant news articles include: 'New Net-Metering Program May Find Few Takers,' The St. John Source (October 23, 2019), and 'V.I. Entities off the WAPA Grid Must Register for the Net Energy Billing Program: VIEO,' Virgin Islands Free Press (September 23, 2020).

Do St Thomas and St Croix have electricity?

As of late 2014, both St. Thomas and St. John were served by one electrical grid run by the Virgin Island Water and Power Authority (WAPA). St. Croix, however, has a separate electrical grid in the WAPA service area. More than 1,000 distributed renewable energy systems were connected to the WAPA grid.

How many solar water heating and PV systems are there?

Approximately 1,500 solar water heating and PV systems have been installed throughout the territory since February 2010. Currently, 15 MW of distributed solar PV are either in place or under construction.

This program is exclusively available to full-time USVI homeowners with no existing solar installed. Selected applicants will receive a 15-year loan with an annual interest rate of 1% to ...

The U.S. Environmental Protection Agency will send \$62.45 million to the territory for residential community solar and power storage projects, federal officials announced Monday. Awarded through the Solar for All grant program, the funding is meant to allow the Virgin Islands Energy Office to develop long-lasting solar programs that enable low ...

The adjoining solar facilities will provide a total of 140 MW solar capacity. The solar-plus-storage system is expected to fulfill 30% of the islands' energy consumption needs. According to the Department of Energy

U S Virgin Islands solar pv panel capacity

(DOE), the U.S. Virgin Islands have heavily relied on fossil fuels to generate electricity in the past.

The U.S. Virgin Islands (USVI) includes the three main islands of St. John, St. Thomas, and St. Croix. The U.S. territory has a population of about 87,000 000 (U.S. Census Bureau 2022), and the primary industry is tourism (CIA 2023) . USVI is highly reliant on fossil fuel for their energy and all fuels are imported.

Honeywell Process Solutions has announced plans to install about 124 MWh of its battery energy storage systems alongside 140 MW of solar at six sites to help the US Virgin Islands cover 30%...

U.S. Virgin Islands U.S. Department of Energy Energy Snapshot Population Size 106,977 Total Area Size 350 Sq.
