

In support of Ukraine's ongoing efforts to strengthen its critical infrastructure, the Ukraine Energy Support Fund is pleased to announce a Market Awareness Event focused on the forthcoming procurement process for rooftop ...

DTEK (Ukrainian: ДТЕК) is the largest private investor in the energy industry in Ukraine. [1] The company's enterprises generate electricity at solar, wind and thermal power plants; extract coal and natural gas, trade energy products in the Ukrainian and foreign markets, distribute and supply electricity to consumers, and develop a grid of supercharger stations for electric vehicles.

There are six main types of renewable energy: solar, wind, geothermal, tidal energy, hydro- and bio-energy. One of the main sources of renewable energy is the sun. Such energy is generated by converting sunlight into electricity using special panels. In Ukraine, according to the NKRECP register, there are up to 1,400 solar power plants.
