

Could solar power be the backbone of Ukraine's energy system?

The war against Ukraine has led to massive destruction of the energy infrastructure. One consequence of this is blackouts in cities. In the future, renewables such as wind and solar power could form the backbone of Ukraine's electricity system. (Image: Oleksii Maznychenko /Adobe Stock)

Should renewables take centre stage in the reconstruction of Ukraine's electricity system?

In their study, the researchers explain why renewables should take centre stage in the reconstruction of the Ukrainian electricity system. Using detailed maps, they show the situation before the war as well as the extent of the destruction and the potential for solar and wind energy.

Can solar power help prevent corruption in Ukraine?

They have determined that solar and wind energy would quickly deliver a distributed power supply system and prevent corruption. The war against Ukraine has led to massive destruction of the energy infrastructure. One consequence of this is blackouts in cities.

How much energy can Ukraine generate?

This technical potential is enormous. The researchers estimate that the potential for wind energy is around 180 gigawatts, while for solar energy it's around 39 gigawatts. A total capacity of 219 gigawatts would vastly exceed the generation capacity of 59 gigawatts that Ukraine had at the start of the war.

How much solar power will Ukraine have by 2027?

The results show that 9.2 GW of solar generation capacity can be integrated into the Ukrainian electricity system by 2027 and up to 14 GW by 2030. This represents an increase of 8.4 GW compared to current capacity and will require an investment of almost EUR5 billion.

Kupiti Zvolozhuvach bagatij mineralami - GIGI Solar Energy Mineral Rich Moisturizer vid brendu GiGi v internet-magazini Cosmy Bezkoshtovna dostavka po Ukrayini ?100% ...
