Larger electronic devices like a laptop could need 12 volts (12V) - 24 volts (24V). Think about what you need to charge before purchasing your portable battery packs. It's also important to consider the size and weight your portable battery pack will take up. The bigger and heavier they are, the more storage capacity they have.

Use external encoder data or CCD detection to perform high-speed tracking of battery position on conveyor and achieve high-speed transfer to the next conveyor. Improve productivity by enabling high-speed transfer without stopping the conveyor, even if the battery position and angle conditions vary.
