

# Use of homemade solar panels

Can You DIY a solar panel?

If you're feeling really ambitious, you can go full-on DIY--using copper sheets, you can create your own PV cells. But the cells you make in your kitchen won't last nearly as long or produce nearly as much power as even the cheapest manufactured cells, so if your goal is power over DIY, you should just buy your cells. Tabbing wire.

Where can I buy DIY solar panels?

Several companies specialise in selling DIY solar panel kits to the public. Plug-in Solaris is particularly easy to follow, and offers a wide range of kits and step-by-step DIY guides, plus accessories such as solar panel mounting kits. Renogy, Select Solar and Sunstore Solar are also well worth a browse.

Why should you make a homemade solar panel?

Solar energy is a renewable source of energy that not only benefits you but the environment as well. With the effort you put into making a homemade solar panel, you can help prevent environmental pollution by reducing fossil fuel usage. What's even better is that you'll save money on your electric bill.

Should I buy a DIY solar panel kit?

To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself. DIY solar panels are widely available and many are excellent value compared with the cost of professional installation. For example, a full 3.4kW 10-panel kit from Plug-in Solar costs £4,728.

How do you build a solar panel?

To build your own solar panel, you'll need to assemble the pieces, connect the cells, build a panel box, wire the panels, seal the box, and then finally mount your completed solar panel. Purchase the cells. There are a few different types of solar cells to buy, and most good options are either made in the United States, China, or Japan.

How much does a DIY solar system cost?

If you're just dipping a toe into solar via the DIY route, start with one off-grid panel in a DIY solar kit that includes all the necessary cables, accessories and instructions, such as Renogy's 200W 12V General Off-Grid Solar Kit (currently just £230).
