

# Uzbekistan top 10 solar companies inia

Is Uzbekistan a good place for solar energy?

Uzbekistan has great potential for solar energy due to its high levels of solar radiation and large areas of barren land that can be used for solar power plants. The country receives an average of around 300 sunny days per year, making it an ideal location for solar power generation. Graphs are unavailable due to technical issues.

Who collects energy statistics in Uzbekistan?

The State Committee of the Republic of Uzbekistan on Statistics is the official authority collecting energy statistics. It will play an important role in the future in collecting data on off-grid solar photovoltaics and solar heat use in households.

How is Uzbekistan promoting solar power?

The government of Uzbekistan has implemented several initiatives to promote the use of solar power, including the development of large-scale solar power plants and the introduction of incentives for individuals and businesses to install solar panels.

How much solar energy does Uzbekistan use?

The solar energy gross potential totals  $2.134 \times 10^3$  PJ, while technical potential is estimated at 7 411 PJ, which is equivalent to almost four times the country's current primary energy consumption. Uzbekistan benefits from high solar irradiation.

Can you buy solar panels in Uzbekistan?

Uzbekistan's government has recently launched a digital online platform which allows owners of private houses to buy solar panels in interest-free installments or a 30 percent reimbursement if they pay it all at once.

Where is the first solar plant located in Uzbekistan?

For instance, French company Total Eren developed one of the first solar station plants in Uzbekistan. Launched in July 2022, the Tutly solar farm is located around a hundred kilometres west of the city of Samarkand.
