We take great pride in the customer care we provide our clients and this focused approach forms the backbone of our company philosophy.

Is solar a good idea for Vanuatu?

Antony Garae, Director of the Vanuatu Department of Energy, said this project is a great boon to his country, where 80 percent of rural residents lack electricity. "Solar is the best solution for these areas not only because of its obvious contributions to climate change mitigation but because fuel is costly and difficult to transport," he said.

How can VGET contribute to a sustainable future for Vanuatu?

VGET's work on renewable energy sources will play a significant role in shaping a sustainable future for Vanuatu, with the project to serve as a valuable inspiration for other Pacific Island Countries and Small Island Developing States on their own paths towards a sustainable future.

Is adept power an APC select partner?

Adept Power are proud to be an APC Select Partner in the UK. What is a UPS? An Uninterruptible Power Supply (UPS) contains a support battery for when a device senses a loss of power from its primary source. It is an electrical apparatus that provides a boost of emergency power to where the input power source is failing.

Will Vanuatu's 'Rarru Cascades' be a 'call-to-action'?

Footage from Eton Beach and Edmat Beach in Port Vila, along with the Rarru Cascades will showcase Vanuatu's natural beauty and importance of environmental protection, encouraging those from outside Vanuatu who will watch the final film to join the call-to-action in pursuit of a future built on the back of renewable energy by 2030.

PCS also provides support to the Vanuatu private and Government telecommunications sector, including greenfield tower builds, microwave and GSM installations, solar hybrid and power upgrades. Our expertise in the offgrid telecommunications arena allows PCS to provide unparalleled support to our remote installations.

The Ministry of Climate Change, in partnership with UNDP and Power-Blox AG, an award-winning Swiss company providing automated and decentralized electricity solutions, has successfully completed the first phase of a

In its National Energy Road Map (NERM), Vanuatu aims to achieve 100 percent electrification with renewable energy by 2030. For this to occur, however, the country has sought the support of the Government of Japan through the Vanuatu Green Transformation Project (VGET).

Vanuatu adept power solutions

Launched in September in the communities of Wintua and Lorlow, the micro-grid is Vanuatu's first-ever community-run power system: members of the communities own and manage it. This keeps electricity costs low as there are ...

We have accumulated customers throughout most of the Vanuatu islands - and are proud that we can provide a safe, environmentally friendly power solutions to the remote domestic market - who otherwise would have no access to power for lighting or mobile phone charging..

Launched in September in the communities of Wintua and Lorlow, the micro-grid is Vanuatu's first-ever community-run power system: members of the communities own and manage it. This keeps electricity costs low as there are no external operation costs or profit margin are usually incorporated into an electricity fee and passed onto consumers.

Vanuatu's geography makes it difficult to create centralized energy systems, which leaves many communities and islands needing electricity, hindering development and forcing the use of fossil fuels for lighting. Only 20 percent of Vanuatu's rural residents have access to electricity.

For many industries, a loss of power can result in detrimental consequences. Whether it's for a school, hospital or supermarket, Adept Power is here to ensure that downtime is prevented with bespoke UPS solutions. We offer an ...
