

How diverse is Vanuatu's primary energy supply?

The ability to assess the diversity of Vanuatu's primary energy supply is limited because much of the supply comes from biomass, where there is a lack of recent and accurate data. Given this, the assessment below focuses on the mix of sources used for electricity generation.

How can Vanuatu be sustainable?

To be sustainable, and to achieve the overall NERM vision, Vanuatu's energy supply and energy infrastructure must be safe for humans and the environment. They must also promote Vanuatu's broader social and environmental objectives as set out in the NSDP.

What are the objectives for accessible energy in Vanuatu?

There are two main objectives for accessible energy in Vanuatu. These objectives also relate to energy affordability (for example, encouraging a switch from kerosene to pico solar systems is likely, over time, to provide households with cheaper lighting). Objective 2 also relates to green growth objectives.

Does Vanuatu have a low electricity bill?

Vanuatu has relatively low electricity bills for small domestic customers, while electricity bills for domestic customers, as well as pre-tax retail petroleum prices, are higher than the average for comparable countries.

Vanuatu Rural Electrification Project is OPEN to all households, aid posts and community facilities. Is Energy Efficiency regulated in Vanuatu? Act Number 24 of 2016 regulates the Energy Efficiency of Electrical Appliances, Equipment & Lighting Products introduced in 2017.

VANUATU MONTHLY ENERGY MARKET SNAPSHOT OF DECEMBER 2020 Electricity source The graph on the left shows different types of energy sources used to produce electricity in Vanuatu during the month of December 2020. The main energy source was diesel combustion that contributed 78.7 % of the total electricity produced. The hydro in

The updated NERM acts as the national energy policy. Since it was launched, Vanuatu's economy and energy sector have continued to develop. External events, such as Cyclone Pam in early-2015, have also shaped how energy sector policies and priorities are conceived. The purpose of this document is to update the NERM to reflect recent developments.

development of energy services in Vanuatu and improve service delivery. The Department is also responsible for the identification, implementation, management and evaluation of energy projects, monitoring and facilitating energy activities as ...

continued to lead the share of the energy mix in 2021, similarly to past years. Diesel generation contributed 79.3 %, followed by hydro contributions of 11.1 %, wind contributed 5.5% and Solar 4.1%. Solar energy contributions include the Government Solar Farms at both Meteo Complex and Parliament House Complex

Vanuatu's National Energy Road Map (NERM) was considered and endorsed by the Council of Ministers in 2013. The NERM is the policy framework for developing the energy sector in Vanuatu. The NERM identified five priorities for the energy sector: access, petroleum supply, affordability, energy security, and climate change.
