The flora of these islands in the European sector of the Arctic does not differ greatly from the general aspect of the flora of Greenland in the west, Franz Josef Land and Novaya Zemlya in the east, or Kola and northernmost Norway in the south. This especially concerns Bear Island and Jan Mayen, both of which are inhabited by a meager flora.

Lid: Flora and Vegetation of Svalbard and Jan Mayen found in Greenland, Iceland, and Norway, and most of them are circumpolar. The central part of the island is botanically the best known; all species except 3 are found here. In Nord-Jan (that is, north of Beerenberg), only ...
