

What will Vietnam's energy mix look like in 2023 - 2050?

Renewable energy sources are projected to make up the majority of Vietnam's energy mix during the period 2023-2050, especially wind power, solar power, hydropower, biomass, and new hybrid green energy sources in the future. Renewable energy technology projects need to be invested in simultaneously, in combination with energy storage technologies.

Will Vietnam face an electricity shortage?

Strategic Plan for Transition to Renewable Energy Sources Vietnam's Energy Ministry predicts that the country is likely to face an electricity shortage as the development of new power plants lags behind the country's rapidly growing energy consumption. The government allowed Vietnamese companies to have 100% foreign ownership in the energy sector.

How good is Vietnam's energy system?

According to the World Energy System Index for the period 2018-2022, Vietnam held the following positions: 83rd place (2018), 91st place (2019), 65th place (2020), 61st place (2021), and 55th place (2022). Despite fluctuations, the overall trend is positive, indicating significant improvement in Vietnam's energy system performance over five years.

Who owns Vietnam's coal-fired power plants?

Most of the capacity of existing coal-fired power plants is owned by state-owned corporations, such as Vietnam Electricity; or EVN (57%), Vietnam National Petroleum Group, or Petrolimex (11%); and Vietnam Coal and Mineral Industries Group or Vinacomin (7%).

What is the Vietnam energy development plan VIII?

The Vietnam Energy Development Plan VIII aims to increase the share of solar energy in renewable sources to 25% within eight years. This initiative also intends to reduce reliance on imported coal energy, thereby providing greater opportunities for the country's solar energy market.

Which thermal power plant in Vietnam uses waste instead of coal?

As of now, the Phu Tho Thermal Power Plant is the sole thermal power plant in Vietnam, utilizing waste instead of coal. Vietnam holds vast potential in renewable energy sources like hydropower, solar energy, wind energy, and biomass.
