In locations where a diesel generator is the only option as the primary energy source, high capacity battery strings can be deployed in conjunction with the generator to provide energy storage. This will decrease generator run time and reduce overall operational and maintenance costs. Further savings can be realized when a solar array is utilized at the site.

The pressing challenge of climate change necessitates a rapid transition from fossil fuel-based energy systems to renewable energy solutions. While significant progress has been made in the development and deployment of renewable technologies such as solar and wind energy, these standalone systems come with their own set of limitations.

Wallis and Futuna comprises two archipelagoes: Hoorn Islands group (also known as the Futuna Islands, and as 'les Horne). Futuna Island (pop.~5,000); Alofi Island (uninhabited) Alofi Island is the smaller of the two.
