

NPG series of Gel batteries offer reliable cold cranking (starting power) and maximum power supply with a superior cycling performance. The robust construction ensures the battery will continue to work through the most extreme conditions with a high resistance to vibration. They are exceptionally clean and safe to handle.
... Koyosonic Power Co ...

Koyosonic has developed LFP series of lithium iron phosphate batteries, offering a drop-in solution for AGM-VRLA or gel battery replacement. Our batteries can be used individually or assembled in series to create 48V system. There are many benefits in LFP series of LiFePO₄ batteries and so they are more and more applied to many fields, such as ...

"Standby Use" - back up power: Standby Use is mainly used for emergency power to avoid future damage that may be caused by a sudden power outage. 2. What are the concerns when using Sunnyway batteries in a parallel or a serial series? 1). Do not mix brands, models and date codes? 2). No separate discharge then charging in a serial configuration.

Koyosonic, a good supplier in power solution, has been specialized in developing and producing Lead-acid batteries, Li-ion batteries and Solar power system since 2002. As one of professional manufacturers, we have been devoted to research and development, manufacture and market to lead users to have right batteries for right power system.

Solid Inter-Cell, Through-The-Partition connectors deliver far less internal resistance for more usable power during critical operating conditions. 5. Performance-oriented venting system provides superior corrosion protection ...

High power, fast charging and discharging. Longer life span than traditional VRLA batteries. Ideal for PSoC cycle application in Renewable Energy (RE). Add functional activated carbon and graphene to negative plates to get excellent acceptance in charge performance. Comply with IEC60896, IEC61427 etc. ... Koyosonic Power Co., Ltd. All Rights ...

Unrivalled cold cranking power up to 135%. 3 x higher levels of cyclic endurance than conventional batteries State-of-the-art AGM technology developed to meet OE requirements. AGM technology with outstanding performance for powerful ...

Koyosonic is a holding company established in 2004, specialized in producing lead acid batteries, located in Tongqian Industrial Park, Tongqiao Town, Huizhou city, Guangdong Province, China. As one of the professional manufacturers in lead acid batteries, we have been devoted to research and development,

manufacture and market to lead the users to have quality batteries ...

Koyosonic has rigorously selected and tested best-in-class Lithium Iron Phosphate cells that are assembled in this product, in order to provide high lifespan and performance. Lithium Iron Phosphate (LFP) is currently the best solution for storing energy, because of its durability, its high safety and its technical superiority compared to other ...

High Power Density. Thick Plates and High-density Active Material. Longer Life in Deep Cycle Applications. Excellent Recovery from Deep Discharge. Good internal water cycling: based on the oxygen compound principle, little gas generated & little water depletion. Excellent discharge characteristics: low internal resistance, compact, excellent ...

Koyosonic has developed LFP series of lithium iron phosphate batteries, offering a drop-in solution for AGM-VRLA or gel battery replacement. Our batteries can be used individually or ...

Koyosonic, a good supplier in power solution, has been specialized in developing and producing Lead-acid batteries, Li-ion batteries and Solar power system since 2002. As one of ...

As one of professional manufacturers, we have been devoted to research and development, manufacture and market to lead users to have right batteries for right power system. Our Lead-acid batteries include AGM batteries and SLI ...

High Power Density. Thick Plates and High-density Active Material. Longer Life in Deep Cycle Applications. Excellent Recovery from Deep Discharge. Good internal water cycling: based on the oxygen compound principle, little gas generated & ...
