

Warranty period of photovoltaic panels

What types of warranties cover solar panels?

There are two basic types of warranties that cover solar panels. A product warranty protects you from defects in a solar panel stemming from material quality or manufacturing errors. This is also referred to as an equipment or materials warranty.

Should I get a warranty on a solar panel system?

A solar panel system is a multi-decade investment that a warranty can help protect. The less solar power your system produces, the more your home may need to draw from the utility company, which eats into your savings.

Should I pay for an extended solar panel warranty?

However, we generally don't recommend paying for an extended panel warranty. In most cases, included warranty coverages are plenty long to protect your equipment through the panel payback period and beyond, which means your solar panel system will be profitable by the time they expire.

Do photovoltaic cells need a power warranty?

Photovoltaic (PV) cells gradually lose performance, and this means the amount of electricity generated will decrease slightly each year. However, a power warranty ensures that this will happen at a very slow rate.

Solar Panel Warranties. Solar panel manufacturers guarantee their products are free from material and workmanship flaws. Their warranty typically lasts for 10 to 25 years, offering extended coverage.
