

We do solar Cyprus

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.

Does Cyprus support photovoltaic systems?

The government of Cyprus, along with the RES and Energy Conservation Fund, offers support schemes for the installation of photovoltaic systems. This is because solar power is considered to be the future of energy and promoting the use of renewable energy sources is a priority.

Who is gesolar Cyprus Ltd?

GESOLAR CYPRUS LTD is one of the leading companies in the field of renewable energy sources (RES) in Cyprus, offering integrated energy solutions with specialization in the fields of Photovoltaic Systems, In-floor Heating /Cooling and Air Conditioning.

What is a solar pump in Cyprus?

Solar pumps in Cyprus are pumps that work with the energy generated by solar panels. Solar pump maintenance is very important to ensure that the system works as it should and that the water is clean.

What incentives are available for installing photovoltaic systems in Cyprus?

Homeowners in Cyprus can take advantage of several incentives for installing photovoltaic systems, including the recently announced Grant Scheme for the installation of photovoltaic systems, which provides financial incentives for the installation of photovoltaic systems.

How long do photovoltaic panels last in Cyprus?

Photovoltaic panels in Cyprus require minimum maintenance. The lifespan of photovoltaic panels in Cyprus can reach 25 years. The real estate market in Cyprus, has shifted towards sustainability and the photovoltaic systems play a huge role in adding extra value to properties.
