

# WeChat State Grid User Binding

What is a WeChat unionid?

UnionID is an unique ID to identify a single user under the same WeChat open platform account. If a developer possesses multiple mobile applications, website applications, and OAs (including Mini Programs), they can use a UnionID to differentiate the uniqueness of users.

What is a WeChat OpenID?

OpenID is an unique encrypted WeChat ID for each user of an OA (including Mini Program). Users have separate OpenIDs corresponding to different OAs. In Developer Mode, when subscribed users interact with an OA, the developer can obtain their OpenIDs and use it to get basic user information (gender, photo, location etc.)

How does WeChat authorization work?

A simplified authorization flow: Step 1: User clicks WeChat login and grants authorization. Step 2: OA gets a temporary code. Step 3: Based on the code, OA gets access\_token from server. Step 4: OA obtains users' basic data with access\_token and OpenID. What is Silent Authorization?

What is a WeChat official account?

The Official Account platform ?????? allows users to push marketing campaigns and service related content to followers on WeChat. The Smart Platform ??????? enables developers to utilize WeChat's artificial intelligence tools, such as image, video, or voice recognition.

What is WeChat open platform?

The Open Platform ?????? connects your app or website to WeChat's mobile services including user authentication and payment. WeChat Open Platform is a hub for mobile applications, website applications, Mini Programs, Official Accounts (OA) and third-party platforms. What are OpenID and UnionID?

How does WeChat login work for third-party apps?

WeChat login for third-party apps is based on the OAuth 2.0 standard (OAuth 2.0 is the industry-standard protocol for authorization). After a user has given permission, the OA will receive a special API calling certificate (authorization access\_token). Based on this access token, the OA may call APIs and obtain the user's basic information.
