

Weight energy storage Vatican City

Does the Vatican need a solar plant?

The implementation of a solar plant not only improves the Vatican's environmental sustainability, but also offers economic and social benefits. By generating its own energy, the Vatican can save on light. This is especially relevant in a context where the price of light is a constant worry for many.

Where is Vatican Radio's New solar power plant located?

The plant will be located in Santa Maria di Galeria, some 11 kilometers from Rome, where Vatican Radio's broadcasting station is located. Not only will this project generate renewable electricity, but it will also be integrated with the land's agricultural needs, combining modern technology with sustainable practices.

Can the Vatican save on light?

By generating its own energy, the Vatican can save on light. This is especially relevant in a context where the price of light is a constant worry for many. The use of solar energy also improves the State's energy efficiency, enabling a more responsible and sustainable light consumption.

In a suite of efforts, Pope Francis has now declared to the Vatican authorities to carry out the next step: to begin constructing a solar plant within the extraterritorial zone of ...

How Does This Benefit Vatican City? The implementation of a solar plant not only improves the Vatican's environmental sustainability, but also offers economic and social benefits.

Pope Francis has unveiled plans for a solar plant that will let the Vatican City generate all its electricity from renewable sources. With an area of 121 acres or 0.44km² and a population of around 825, the Vatican City in Rome is the smallest independent state in the world by both area and population.
