

In a common research program, the Martinique energy agency and CEA decided to assess the variability of solar resource and PV power in Martinique Island and in the Provence region,...

Martinique has a high solar potential and set a renewable energy mix target of 100% by 2030. Presently Martinique energy mix is comprised of 25% renewable energy on the public grid. Its electrical demand peaks at 235MW and its electricity prices are very high relative to ...

EcoCarib was brought into the marketplace to help solve the Caribbean's problem of high energy costs and aid the region's transition to a more sustainable future. We improve energy access and affordability through an innovative energy ...

Depuis plus de 13 ans, HELIOS ECO ENERGY, entreprise spécialisée dans les énergies renouvelables en Martinique (972), conçoit et commercialise des offres dans le domaine du solaire photovoltaïque et de l'olien pour les particuliers, les professionnels et ...

EcoCarib was brought into the marketplace to help solve the Caribbean's problem of high energy costs and aid the region's transition to a more sustainable future. We improve energy access and affordability through an innovative energy trading platform, which empowers users to become prosumers in the energy markets.

In Martinique, Albioma has built, commissioned and is now operating the Galion combustion turbine and the first all-biomass thermal power plant in Overseas France. Against the backdrop of the energy transition, this new facility, Galion 2, covers approximately 18% of the island's power needs, while also enabling the share of intermittent ...
