

Is natural resource exploitation a problem in Western Sahara?

As the issue of natural resource exploitation in Western Sahara has been conceptualised in very different ways and from the perspectives of a variety of disciplines, the authors have opted for a semi-systematic review of the work done encompassing academic, non-academic, and activist backgrounds.

Is the Sahara based on economic resources?

The idea of the economic viability of the SADR being based on its economic resources is also found in Shelley (2004) and echoed by MINURSO and UN Special Envoy to the Sahara, James Baker. Kingsbury (2015) establishes that Western Sahara is illegally and militarily occupied by Morocco.

How interdisciplinary is research on natural resource exploitation in Western Sahara?

The production of research on natural resource exploitation in Western Sahara is accelerating. Yet this field remains interdisciplinary, and the work is carried out by researchers from academic, non-academic, and activist backgrounds, with sometimes very different aims and envisaged audiences.

Is Kuwait a solar and wind energy exporter?

Kuwait offers optimum conditions for the development of solar and wind energy solutions to enhance energy production. The government recently suggested a plan for the development of solar energy with a more ambitious vision to act as a solar and wind energy exporter.

Can Sahrawis take advantage of mineral deposits in Western Sahara?

This Earth Sciences paper seeks to help Sahrawis living in exile and the liberated zone of Western Sahara to take advantage of the mineral deposits in their territory. The authors' research develops a low-cost exploration methodology based on inexpensive remote sensing data.

What role did natural resources play in the Western Sahara conflict?

The majority of research undertaken from a historical perspective on the role of natural resources in the Western Sahara conflict focuses on phosphates. Both Lalutte (1976) and Camprub & (2015) see the potential exploitation of phosphates as the key factor in motivating Morocco to invade Western Sahara.

The multiple ecological crises provoked by human activities are linked to and exacerbate the other political, social and economic challenges currently faced by North Africa. ...
