Where can I learn about solar photovoltaics operations & maintenance?

In partnership with the Department of Energy's Federal Energy Management Program and the California Energy Commission's Empower Procurement Program, Berkeley labs offering three trainings regarding solar photovoltaics operations and maintenance. The first two webinars in this series can be found below.

What is operation & maintenance (O&M) of photovoltaic (PV) systems?

This guide considers Operation and Maintenance (O&M) of photovoltaic (PV) systems with the goal of reducing the cost of O&M and increasing its effectiveness. Reported O&M costs vary widely, and a more standardized approach to planning and delivering O&M can make costs more predictable.

Do photovoltaic systems need maintenance?

The expansion of photovoltaic systems emphasizes the crucial requirement for effective operations and maintenance, drawing insights from advanced maintenance approaches evident in the wind industry. This review systematically explores the existing literature on the management of photovoltaic operation and maintenance.

What is PV system monitoring?

PV system monitoring helps operators create an "energy balance" that accounts for the amount of solar resource available, as well as the losses in each energy conversion process up to delivery at the point of interconnection. Monitoring is a powerful tool for understanding PV system performance, and it is fundamentally dependent on the

What is dual-use photovoltaic (PV) & end-of-life management?

Dual-use photovoltaic (PV) technologies, also known as dual-use PV, are a type of PV application where the PV panels serve another function besides the generation of electricity. End-of-life management for PV refers to the processes that occur when solar panels and all other components are retired from operation.

What is the best-practices guide for PV O&M?

To address this barrier to continued PV investment, the PV O&M Working Group has developed a new best-practices guide for PV O&M. The guide encourages high-quality PV system deployment and operation that improves lifetime project performance and energy production.

To address this barrier to continued PV investment, the PV O& M Working Group has developed a new best-practices guide for PV O& M. The guide encourages high-quality PV system ...

Funding comes from the Solar Energy Technologies Office and Federal Energy Management Program within the U.S. Department of Energy. Disaster recovery support is sponsored by the ...
