

What to do with photovoltaic panels installed on the roof

Can a roof support solar panels?

Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability.

How do you remove solar panels from a roof?

Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system. Contact the solar panel installers to remove the solar panels. Roofing companies don't do removal. The installers will know how to disconnect solar panels.

Can I install a new roof if I have solar panels?

Though you can install a new roof while panels are installed, the process of installing a new roof on a roof that already has solar panels is straightforward: Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system.

How do solar panels attach to a roof?

Installers fix solar panels to a roof by lifting up some roof tiles and attaching mounting brackets to the rafters, before carefully placing the tiles back where they were. They'll then attach rails to these brackets, before locking solar panels into the rails.

Can solar panels be installed on a leaking roof?

There have been many times Home Evolution has been called out to inspect a leaking roof that has solar panels installed on it. We would then find out that the roof is at the end of its life expectancy and needs to be replaced, while the solar panels have been installed recently.

Do solar panels go on a shingle roof?

As a roofing contractor, we see our fair share of shingle roofs with solar panels installed on them. In some cases, the solar panels were replaced along with the roof. In other cases, the solar panels were recently installed, while the shingles have been on the roof for quite some time.

When a solar panel array is installed on a tile roof, they will need to be attached to brackets that will lift the panels above the roof. The distance that the panels must be raised will be dependent on the material ...
