Where can I buy a solar panel kit?

Many people commonly purchase solar panel kits from Amazon that include the majority of equipment necessary for getting a solar panel system up and running (i.e., wiring, solar panels, the inverter, etc.). Most solar panel kits are best suited for smaller applications, such as an RV or boat instead of a home.

Where should solar panels be installed?

Solar panels can be used to power even smaller amounts and come as wall mounts or flexible pads to aid portability. Solar panels for home use come as stationary units that are installed on roofs, posts or outer walls. Panels should be installed on south-facing surfaces to maximize exposure to the sun. Find mounting kits to aid installation.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof-- in a region with long peak sunlight hours -- with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.
