

Where to sell solar-generated electricity

How do you sell solar energy back to the grid?

Selling electricity back to the grid, also known as an export rate, or net metering, is a process that allows solar panel owners to generate their own electricity and earn credits for excess energy they feed back into the grid. Here's a detailed explanation of each step involved in sell solar power: 1. Installation of solar panels:

How do you sell back solar power?

Read on to learn about the different ways to sell back power. This is the most common way consumers believe they can sell electricity to the grid. However, the way that you can earn income from excess solar power is through net metering. Currently, there are over 35 states that offer a net metering program for solar system owners.

Can you sell solar power to the grid?

Although many people with solar systems on their homes or businesses think that they can sell excess electricity to the power grid, the reality is that you can only sell power to the grid if you have an electricity generator's license and qualified power-generating assets.

Why do utility companies sell solar power back to the grid?

Utility Company Competition: When you sell solar power back to the grid, you contribute to a more competitive energy market. Utility companies are now incentivized to offer better service and potentially lower rates because they are competing with solar energy systems and other renewable energy source providers.

Can you sell solar energy certificates?

For homeowners with solar energy systems, one of the primary benefits is the potential to lower energy bills and even make extra income. In some states, you can sell Solar Renewable Energy Certificates (SRECs), which allow you to earn additional money based on the amount of renewable power your system generates.

How much can you earn selling energy back to the grid?

How much you can earn by selling energy back to the grid depends on a few key factors: your energy usage, how many kilowatt-hours (kWh) your solar system generates, and the incentives offered by your state and utility company. Here's a deeper look:

When you sell your SREC, you are not actually selling the electricity generated by your solar system. The electricity for which you get your SREC is either used or exported to the grid by you. SREC is a special incentive offered for your ...
