

Who should I contact to apply for the installation of photovoltaic panels

Do I need a permit to install solar panels?

3. What Type of Solar Panel Installations Require a Permit? Most solar installations, whether roof or ground mounted, require a permit, as there are specific codes for every type of solar panel installation. 4. What is the Process of Obtaining a Solar Permit?

Do you need a solar company to install your solar system?

In most cases, your solar company orders your panels and system parts for you, especially in the event of a lease or PPA. If you've skipped a few steps and already have your solar panels, some contractors may be willing to install your rooftop array and complete the system with any other components necessary for safe and efficient operation.

How do I get a solar panel system?

Once you have approval from your local AHJ and utility, it's time to obtain the physical elements of your solar panel system. In most cases, your solar company orders your panels and system parts for you, especially in the event of a lease or PPA.

Do you need an engineering evaluation to install solar panels?

You need an engineering evaluation to make sure the installation is completely viable. In this crucial step, a professional visits your property to make sure it's suited for solar panels.

Can I install solar panels myself?

You can install solar panels yourself, but doing it alone involves risks. Going solar has significant financial benefits: it reduces your monthly electricity costs and can even increase the value of your home. Incentives can lower your overall cost drastically, but solar is still a big investment.

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.
