

# Why aren't photovoltaic panels installed in the ground

Do ground-mounted solar panels work?

As the name suggests, ground-mounted solar panels are mounted to the ground, rather than a roof. In most cases, it's easiest and most cost-effective to get a rooftop solar system. But if rooftop solar won't work for your home, ground-mounted systems offer some clear benefits.

Can you install solar panels on the ground?

Solar panel installations are subject to 0% VAT, and a 4kW-5kW system with SEG can save £640 - £685. You must have heard about rooftop solar panels, but did you know that you can also install solar panels on the ground? Ground-mounted solar panels are installed on the ground instead of the roof.

What is the difference between ground-mounted solar panels and on-roof solar panels?

Ground-mounted solar panels and on-roof solar panels differ primarily in their installation locations and associated benefits and challenges. Ground-mounted solar panels are installed on the ground, typically in open spaces, and offer greater flexibility in orientation and tilt, which can maximise energy production.

Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land, opt for ground-mounted panels.

Are rooftop solar panels better than ground-mounted solar panels?

In the UK, it's generally smarter and cheaper to go with roof-mounted solar panel systems instead of ground-mounted. They take up less space, cost a lot less to install, and don't require as much paperwork. Let's take a closer look at the various reasons why rooftop solar panels are the better choice for most households.

Are ground-mounted solar panels a good option?

Ground-mounted solar panels are a benefit-rich alternative to the rooftop-mounted variety. You'll just need around 20-30 sq m of space (for an average 3-bedroom home) - and a decent budget. At around £10,000-£15,000 per system, ground-mounted panels cost 25-35 per cent more than their roof-mounted counterparts.
