

Why is it not recommended to install photovoltaic panels

Why should you install solar panels at your home?

When you install solar panels at your home, you generate your own electricity, become less reliant on your electric utility, and reduce your monthly electricity bill. A solar panel system typically has a 25- to 35-year lifespan, meaning you can cut your electricity costs for decades by going solar.

Are solar panels right for You?

Solar panels are best for people who live in good solar states with solar-friendly policies, like net metering and solar incentive programs. Homes with south-facing roofs and lots of unshaded space are also ideal for solar. Homeowners with high electricity bills are among those who can benefit the most from going solar.

Are rooftop solar panels right for You?

Rooftop solar panels aren't the perfect fit for everyone, but that's okay. Like any other home electrification product, solar panels provide clear benefits to homeowners needing energy upgrades and electricity bill reduction. The pros of solar outweigh the cons in most situations.

Can solar panels be installed on the ground?

You can install solar panels on the ground, but are more expensive to install and require additional space. Consult a reputable solar panel installer to confirm whether your roof is compatible with solar panels. You'll see the best return on investment if you install solar panels on a home you plan to stay in for a while.

Can you install solar panels on a roof?

However, you will need solar batteries to store excess energy to use at night and when it's overcast. You can install solar panels on the ground, but are more expensive to install and require additional space. Consult a reputable solar panel installer to confirm whether your roof is compatible with solar panels.

Why do people not buy solar panels?

For every scam and pushy sales person there is an honest, experienced local installer ready to help you meet your energy goals. Another reason people don't buy solar panels is because they're stuck on a misconception about the solar industry, like that solar is expensive or short-lived. [u/Jm11890](#) said: I've worked in the industry for 7 years now.
