Some of Greece's best spots for producing wind and solar energy are on the islands. Despite this, the islands tend to be more reliant on fossil fuels compared to the mainland, said Dr. Eleni Zafeiratou, who studied energy modeling and planning on Greece's island during her Ph.D. program at the University College London.. For example, on Santorini with its white ...

The power of wind has impressed Greeks from the ancient times. Actually, according to the Greek mythology, wind was worshipped by the humans as god Aeolus, who along with his eight assisting gods, that is, the so-called Anemoi, each assigned with one wind direction (Boreas (N), Kaikias (NE), Eurus (E), Apeliotes (SE), Notus (S), Livas (SW), ...
