

Working hours for cleaning photovoltaic panels

How long does it take to clean solar panels?

The total time it takes to clean your solar panels depends on the location of your solar panels and how many need to be cleaned. Small, ground-floor set-ups can take around half an hour to clean. Larger solar panel banks or those mounted above the ground floor (on roofs, for example) can take between 1-2 hours to clean.

How often should solar panels be cleaned?

Generally, it is recommended to clean your solar panels at least twice a year. However, if you live in a particularly dusty area or experience frequent bird droppings, more frequent cleaning may be necessary. Delve into the best practices for solar panel cleaning, discover common mistakes, and read our step-by-step for cleaning your solar panels.

How much does solar panel cleaning cost?

Solar panel cleaning costs between £4 - £15 per panel. The total solar panel cleaning cost will be affected by several factors, listed below. The biggest influence on price is whether your solar panels are on the ground floor or on upper floors. The higher the panels, the more expensive they will be to clean.

Do solar PV panels need to be cleaned?

That said, most solar PV panels in the UK will not need any heavy-duty cleaning because regular rain will wash most dirt and grime off the surface, dispelling one of the myths about solar being its difficulty to clean.

How many square meters can a solar panel be cleaned a day?

With the right cleaning technique, it is possible to clean a solar panel area of up to 1,500 square metres per day. We recommend an attachment with two disc brushes that reach a working width of 800 millimetres.

Why should you hire a professional solar panel cleaner?

Professional solar panel cleaners are trained to work at height. The difference in price covers both the equipment and training necessary to safely clean solar panels above the ground. Before booking a solar panel cleaner, ask for their solar panel cleaning price list so you can compare quotes and understand exactly what you are being charged for.

To improve the efficiency of solar panels, the removal of surface contaminants is necessary. Dust accumulation on PV panels can significantly reduce the efficiency and power ...

Cleaning frequency depends on the location and environmental conditions. In general, solar panels should be cleaned every 6 to 12 months. However, areas with heavy dust, pollen, or pollution may require more frequent cleaning.
