Can you store condensate in a storage facility?

anyway.. when you have access to the condensate storage you can store it,you can make multiple trips into leap of faith,get some,bring it to your storage facility and distribute it...

How do you produce a condensate?

You don't actually produce the condensate,you merely collect it (manually) from the ancient object that produces it. Once you transport it back to network space,via whichever means you choose,you can then automate its distribution. Originally posted by null ():

How many condensate transports can a behemoth carry?

FYI: you could,theoretically,load 44 Condensate transportsonto a Behemoth and transport them all through at the same time. Get two of these "fleets"; and you could exchange them every hour IF you could figure out the timing.

After completing the main quest, and capturing both transports. I gathered up as much pro as possible. Managed to build a storage facility at 2 of my stations and transferred the cargo there. I also set the sell level as low as possible, due to the fact you get an angry message after selling at the stock price lol. So far my trade ships have not sold any of it.

Hey guys, just had a couple of quick questions. I've googled but it is surprisingly difficult to find good X4 plot stuff online. So, here we go: 1. I am at the part of the TOA plot where you are on the yacht with the twins and you have to decide how to proceed (Northriver or strike out on your own). What do these decisions cause? In my play through, I have done a pretty ...

Make sure your PHQ already has at least one condensate storage facility installed, obviously. I had eight on mine, so my PHQ now has 8,000 units of Protectyon in storage, with an extra 2,500 being carried by 100 Raleighs and 450 on my Astrid. ... ? X4: Foundations; ? Because apparently the only way to utilize anomalies is for me to directly pilot a ship through them, I'm trying to figure out the best way to automate Protectyon distribution. So far my best idea (which still seems pretty dumb) is to fit out 2 carriers/auxillary ships with a large number of Raleigh (Condensate) ships. Then when the spoiler event happens that allows ...

At least the plot is about the "high price" of protectyon and that only comes with low availability in X4 - when there is 5000/5000 available, prices are as low as they can get. ... I just found the Condensate storage module size S which, according to the encyclopedia, can hold 10000 "somethings" of protectyon. Probably m#179;? So 1000 protectyon ...
