

About GEO. GEO is a set of free interactive databases and tools built collaboratively by people like you. GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.

Since 2015, several local and international organisations have attempted to tackle Yemen's energy crisis. One such effort was made by the World Bank, by implementing an emergency project in Yemen to provide solar energy systems for schools and health centres, particularly in remote areas. The project cost was estimated at USD \$150 million, and ...

Yemen: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
