panels, high energy density batteries, and diesel generators to optimize energy efficiency. Each ZeroBase system is designed to be a low-maintenance, self-contained, turnkey solution that will provide uninterrupted adaptable levels of power that work on or off grid.

The MX Series provides pure sine wave single phase or three phase power for shelters, command posts, or any other site that requires continuous, clean, reliable energy. The MX Series can be interfaced with up to two generators, or one generator and local grid, and can significantly reduce generator fuel consumption.
