

Who is Zeta energy?

Chairman and CEO of US Grid Company and a respected leader in the US power industry. He has been responsible for structuring and investing more than \$100 billion in power and energy assets. Zeta Energy creates safe and long-lasting lithium-sulfur batteries that are higher performing, lower cost and sustainably manufactured.

Does Zeta energy use cobalt?

Zeta Energy's lithium-sulfur battery technology has been rigorously tested and has shown consistently better performance than existing lithium ion batteries. Even more importantly, Zeta Energy's lithium-sulfur batteries use no cobalt, nickel, manganese or graphite.

Why should you choose Zeta energy?

Zeta Energy's raw materials and production processes give it one of the industry's lowest carbon footprints. Their higher density, lower cost, and better safety profile than today's batteries will enable breakthroughs in electrification that help us address climate change and democratize energy production.

Will Zeta's patented lithium-sulfur technology improve the performance of electric batteries?

Tom Pilette, CEO of Zeta Energy, expressed hope about the cooperation, pointing out that integrating Zeta's patented lithium-sulfur technology with Stellantis' worldwide production capability might improve the cost and performance profiles of electric batteries.

What are Zeta energy sulfur-based cathodes?

Zeta Energy sulfur-based cathodes are inherently inexpensive, have effective cost-per-energy, use no cobalt, graphite, nickel or metal, reducing cost volatility and dependency on foreign nations.

Zeta Energy has created the world's first and only successful lithium-sulfur battery! Offering three times the energy density of today's lithium-ion batteries and at less than half the price per kWh, Zeta Energy's lithium-sulfur batteries are ...
